STUDENT SPEAK

Abhay Bhandarkar: I had attended UR Academy last year for the CET/NEET crash course. Post lockdown when the colleges were closed and studies had taken a jolt, UR Academy proved to be extremely beneficial to get my fundamentals right and revise my concepts. Professor GK Bhat and his team of teachers are outstanding and are always there for the students both academically and psychologically and through their exuberant teaching skills embibe a deep sense of responsibility and motivation in the students. I would strongly recommend UR Academy for anyone planning to pursue "UR" career in Medicine and Engineering.

Monica Arun : As a student of their crash course programme, I can say that UR Academy has been most resourceful and knowledgeable to me in this much needed time. The teachers are always ready to explain any given topic. They also provide a set of worksheet booklets which enhances the problem solving ability.Complex topics are taught in a simpler way by means of concept maps. Regular daily tests are also conducted. It's the best place for effective time utilization.

Sacheth : I was a part of the UR Academy CET crash course from may to June 2022. The course was comprehensive and was very well organised. All the teachers brushed up our concepts and conducted tests and mock exams on a regular basis. The study material given was rich in problems of various types and formats asked in the CET exams before.

Pranav: I did my 12th from mes kishora Kendra and joined UR academy's crash course for my entrance exams. It is one of those places where you can expect the best teachers. They give you the best and time saving methods to solve problems. The teachers were able to resolve my queries whenever I reached out to them. Thanks to UR academy, I scored well in my entrance exam and was able to get into one of the best colleges
